Introduction

On the basis of nature
of Raw material

- Primary
- Secondary
- Tertiary

Issues associated 🤔

Rise in tertiary sector?

Reasons for disparity? 🤔

How to create more employment?

On the basis of
working condition

- Organised
- unorganised

On the basis
of ownership

- Public
- Private

Importance of
public sector

Sectors of Economy Activities

Primary Sector

Agriculture Sector

- Forms the base for all other products.
- Example. 🤔

Secondary Sector

Manufacturing Sector

- Natural products are changed into other forms through ways of manufacturing.
- Example. 🤔

Tertiary Sector

Service Sector

- Essential for the development of primary and secondary sector.
- Example. 🤔

All the three sectors are highly interdependent. 🤔

Comparing the Three Sectors

How to count the various goods and service produced. 🤔

Values rather than goods and services.

Precaution while doing so. 🤔

Value of **only final goods and services** to be included in calculation, because value of **intermediate goods** already included.

This will lead to problem of **double counting**.

GDP

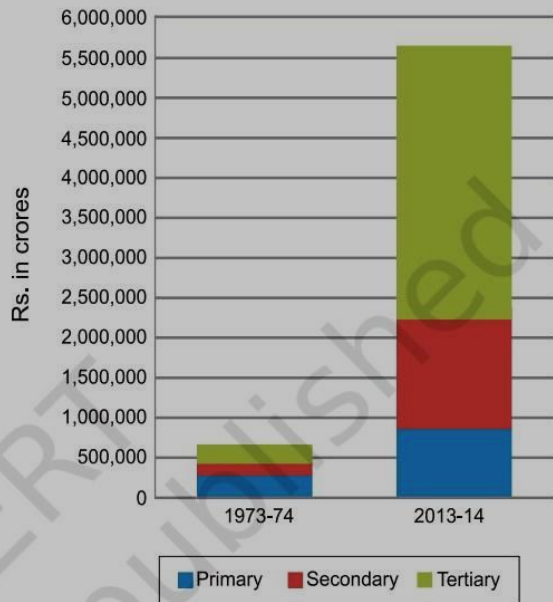

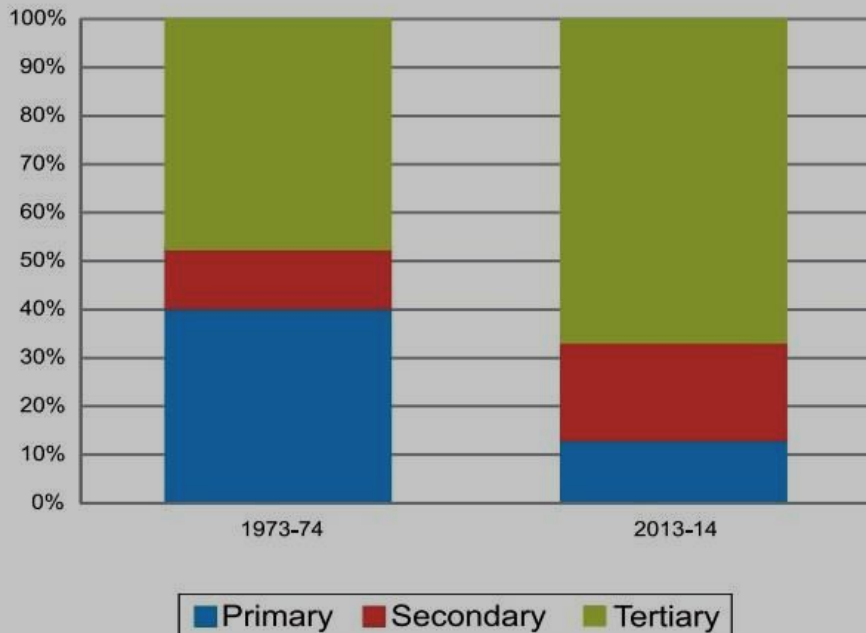

Gross Domestic Product

The sum of the value of final goods and services produced in all sectors during a particular year provides the total production in country know GDP.

Historical Change in Sectors

Situation of Primary, Secondary and Tertiary sectors in India. 🧐

Primary, Secondary and Tertiary sector in India**Graph 1 : GDP by Primary, Secondary and Tertiary Sectors****Graph 2 : Share of Sectors in GDP (%)**

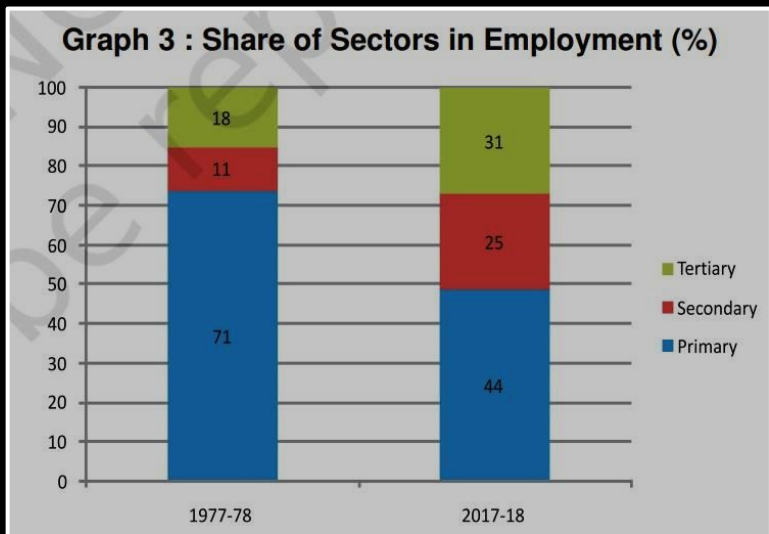

Primary, Secondary and Tertiary sector in India

Rising importance of the Tertiary sector in production. 🤔

- Several services are **basic services**, government has to take responsibility for the provision of these services. Ex - Hospitals, education, police, etc. 🤔
- Development of **agriculture and industry** leads to the development of services.
- With the rise in income level, certain sections of people start **demanding many more services** like eating out. 🤔
- Growth of **information and communication and technology**. 🤔

However, not all the services are growing equally well. 🤔

Where are most of the People Employed?

How to deal with disguise unemployment.

Example of Sukhram.

Is underemployment happens only in agriculture sector?

Reasons for disparity. 🤔

Share in employment V/S Share in GDP

- Not enough jobs were generated in Secondary and tertiary sector.
- Worker in agriculture sectors are underemployed.

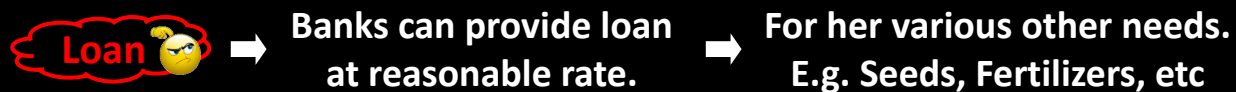

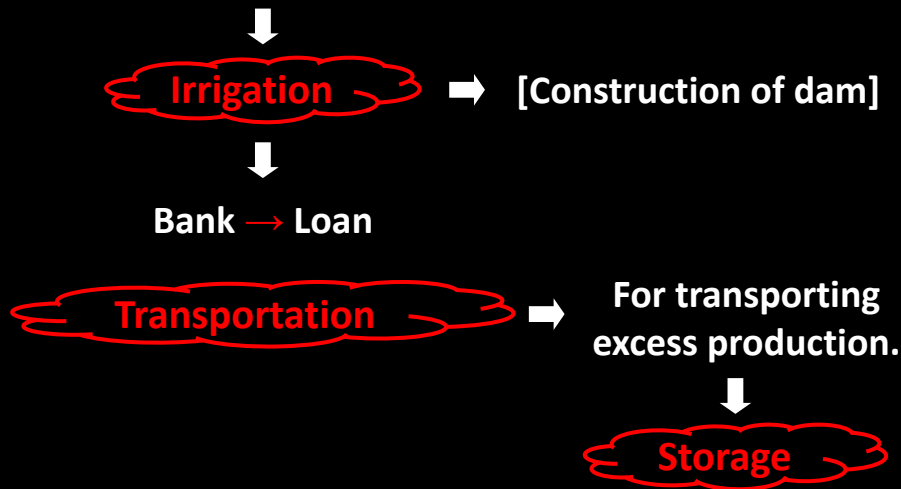

Disguised unemployment

Example of Laxmi:

- Division of labour effort.
- Hidden unemployment.

How to Create more Employment

Related with Laxmi's story.

Another ways to increase employment.

- Establishing small scale industries.
- Example -
 - Cold storage.
 - Agriculture products processing units.
 - Honey collection centre.
- Working on the areas where there is possibility to improve employment.
Example - Education, Health and Tourism.

How to Create more Employment

Recognising the need to create employment, the central government in India made a law implementing the right to work.

MGNREGA 2005

- **Mahatma Gandhi National Rural Employment Guarantee Act 2005.**
- **Guaranteed 100 days of employment to all those who are able to and are in need of work in rural area.**
- **If government fails to provide employment, unemployment allowances will be given to the people.**
- **The work that would help in future to increase the production from land will be given preference under the Act.**

Division of Sector as Organised and Unorganised

Story of Kanta and Kamal. 🤔

Organised Sector

- Registered under the government and works under its supervision.
- Follow rules and regulations and laws such as the factories act, minimum wages act.
- Workers enjoy security of employment.
- Working hours are fixed.
- Workers get paid leaves, paid for overtime pensions on retirement.

Unorganised Sector

- Small and scattered units which are largely outside the control of the government.
- Rules and regulations are not followed.
- Employment is not secure.
- Working hours are not fixed.
- No paid leaves, no provisions of overtime, paid leaves etc.

How to Protect in Unorganised Sector?

Shifting of organised sector to unorganised sector. 🤔

Why?

↓
Impact 🤔

In Rural area

- Landless agricultural labourers, small and marginal farmers, share croppers and artisan such as weavers, blacksmith and carpenters are needed to be protected.
- They must be supported through adequate facility for timely delivery of seeds agricultural inputs credits, storage facilities and marketing outlets.

In Urban area

- Workers in small scale industries, casual worker in construct, trade and transport etc are working in unorganised sector.
- A Government should support them in procuring raw material and marketing of output.

Protection is required at the socio-economic level [SC, ST and OBC]

Sector in Terms of Ownership: Public and Private Sector

Public

- Government owns most of the assets and provide all the services.

Ex- Railways or post office.

- Service motive

Private

- Private owner owns most of the assets and provides services.

Ex- TISCO or RIL.

- Profit motive.

There are several sectors in which only government is able to invest and manage

Why?

- Certain things are needed by society as a whole and require huge investment. Private sector will not be provided at a reasonable cost. **Ex-** Irrigation, Road, Bridges.
- For the growth of some sectors, support of government is essential. **Ex-** Selling Electricity, PDS.
- Some activities are the primary responsibility of government and government must spend on these. **Ex-** Health and Education.
