

30 CHAPTERWISE IMPORTANT QUESTIONS

Social Science (087) | CBSE 2026-27

Development

Economics | Board-examinable

30 original revision questions with answers: short-answer, competency, assertion-reason and long-answer practice. Set is based on the current syllabus and official question-paper style; it is not a prediction or an official CBSE paper.

Question 1

Why can two people have different development goals?

Answer:

Their needs, work, resources, and social position differ. A project that raises one person's income may harm another through displacement or pollution, so development goals can conflict.

Question 2

What is per capita income, and why is it not a complete measure of development?

Answer:

Per capita income is total income divided by population. It gives an average but hides inequality and does not measure health, education, security, or environmental quality.

Question 3

Why is sustainable development important?

Answer:

It meets present needs while protecting the ability of future generations to meet theirs. Using resources carefully and reducing pollution helps preserve long-term well-being.

Question 4

What is the central idea or skill tested in Development?

Answer:

The central focus is: Their needs, work, resources, and social position differ. This is the starting point for a strong answer from this chapter.

Question 5

Write two relevant points for a short answer based on Development.

Answer:

First point: Their needs, work, resources, and social position differ. Second point: Per capita income is total income divided by population. Link the two points clearly instead of listing them without explanation.

Question 6

How does the first key idea in Development lead to an important result or conclusion?

Answer:

Begin with the key idea: Their needs, work, resources, and social position differ. Then connect it to the result: Per capita income is total income divided by population.

Development - Continued

Question 7

What evidence, calculation, incident or concept best supports the first main idea in Development?

Answer:

Use this supporting detail: Their needs, work, resources, and social position differ. A project that raises one person's income may harm another through displacement or pollution, so development goals can conflict. The relevant detail should be stated before giving the final conclusion.

Question 8

Explain the importance of the second major idea in Development.

Answer:

Per capita income is total income divided by population. It gives an average but hides inequality and does not measure health, education, security, or environmental quality. Its importance lies in showing how the chapter develops the topic beyond a simple fact or definition.

Question 9

What common mistake should a student avoid while answering a question from Development?

Answer:

Do not give only a conclusion. Explain the reasoning with a correct detail, such as: It meets present needs while protecting the ability of future generations to meet theirs.

Question 10

Compare the first and second important ideas in Development.

Answer:

The first idea is: Their needs, work, resources, and social position differ. The second idea is: Per capita income is total income divided by population. A complete comparison states both the difference and the connection between them.

Question 11

Show a cause-and-effect link from Development.

Answer:

Cause or starting point: Their needs, work, resources, and social position differ. Effect or outcome: Per capita income is total income divided by population. Use connecting words such as 'therefore', 'as a result', or 'thus'.

Question 12

What is the most useful sequence for explaining the main content of Development?

Answer:

A clear sequence is: Their needs, work, resources, and social position differ. Next, Per capita income is total income divided by population. Finally, It meets present needs while protecting the ability of future generations to meet theirs.

Development - Continued

Question 13

Give a 40-50 word answer outline for an important question from Development.

Answer:

Start with the direct answer: Their needs, work, resources, and social position differ. Add one supporting point: Per capita income is total income divided by population. End with the outcome or message: It meets present needs while protecting the ability of future generations to meet theirs.

Question 14

How should you support an answer from Development with a relevant example or fact?

Answer:

Use a precise example or explanation: Their needs, work, resources, and social position differ. State the fact, then explain its significance rather than leaving it as a name or date alone.

Question 15

How can an examiner see that you understand, rather than memorise, Development?

Answer:

Connect the idea to its reason or result. For instance: Per capita income is total income divided by population. Then explain why this point matters in the chapter's context.

Question 16

State one inference that can be drawn from the main situation or concept in Development.

Answer:

A sound inference is that it meets present needs while protecting the ability of future generations to meet theirs. This inference must be supported by a relevant point from the chapter.

Question 17

Frame a short competency-based response using the first two ideas in Development.

Answer:

Apply the concept by first stating: Their needs, work, resources, and social position differ. Then justify the response with: Per capita income is total income divided by population.

Question 18

What would make an answer from Development incomplete?

Answer:

An answer is incomplete if it omits the explanation or final implication. Include both: Their needs, work, resources, and social position differ. Also add: It meets present needs while protecting the ability of future generations to meet theirs.

Question 19

Prepare an Assertion-Reason style explanation based on Development.

Answer:

Assertion: Their needs, work, resources, and social position differ. Reason: Per capita income is total income divided by population. Check whether the reason actually explains the assertion before choosing an option.

Development - Continued

Question 20

How should you justify an answer from Development in two clear steps?

Answer:

Step 1: state the concept or event - Their needs, work, resources, and social position differ. Step 2: support it with the explanation or result - Per capita income is total income divided by population.

Question 21

What answer structure is suitable for a 3-mark question from Development?

Answer:

Use three connected points: Their needs, work, resources, and social position differ. Per capita income is total income divided by population. It meets present needs while protecting the ability of future generations to meet theirs. Keep the points specific and write them in a logical order.

Question 22

What answer structure is suitable for a 5-mark question from Development?

Answer:

Give an introduction, develop these key points - Their needs, work, resources, and social position differ. Per capita income is total income divided by population. - and close with: It meets present needs while protecting the ability of future generations to meet theirs. Add a diagram, equation, example, or textual reference where relevant.

Question 23

How can the ideas in Development be applied to a new situation or case study?

Answer:

Identify the relevant principle first: Their needs, work, resources, and social position differ. Then use the chapter's reasoning to explain the case: Per capita income is total income divided by population.

Question 24

Which detail from Development is most likely to earn an extra mark when explained correctly?

Answer:

A useful detail is: It meets present needs while protecting the ability of future generations to meet theirs. Explain it in context instead of using it as an isolated statement.

Question 25

Write a brief concluding statement for an answer on Development.

Answer:

A suitable conclusion is: It meets present needs while protecting the ability of future generations to meet theirs. This conclusion should follow naturally from the explanation rather than introduce a new point.

Question 26

Make a three-point revision note for Development.

Answer:

1. Their needs, work, resources, and social position differ. 2. Per capita income is total income divided by population. 3. It meets present needs while protecting the ability of future generations to meet theirs. Revise these points with the chapter's examples, terms, and practice questions.

Development - Continued

Question 27

How would you self-check an answer from Development before submitting it?

Answer:

Check that you have answered the exact question, used the key idea - Their needs, work, resources, and social position differ. - and supported it with a reason, example, calculation, or outcome such as: Per capita income is total income divided by population.

Question 28

Why does Development remain important for revision?

Answer:

It combines factual recall with explanation and application. The main takeaways are: Their needs, work, resources, and social position differ. Per capita income is total income divided by population. It meets present needs while protecting the ability of future generations to meet theirs.

Question 29

Create a final 60-80 word answer plan for a long question from Development.

Answer:

Opening: Their needs, work, resources, and social position differ. Development: Per capita income is total income divided by population. Conclusion: It meets present needs while protecting the ability of future generations to meet theirs. Use complete sentences and include all required evidence, steps, or references.

Question 30

What is one last-minute revision question you should ask yourself about Development?

Answer:

Ask: 'Can I explain why this is true or important?' A correct self-answer should include: Their needs, work, resources, and social position differ. and Per capita income is total income divided by population.
