

30 CHAPTERWISE IMPORTANT QUESTIONS

Social Science (087) | CBSE 2026-27

Manufacturing Industries

Geography | Board-examinable

30 original revision questions with answers: short-answer, competency, assertion-reason and long-answer practice. Set is based on the current syllabus and official question-paper style; it is not a prediction or an official CBSE paper.

Question 1

Why is manufacturing important to economic development?

Answer:

It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. A stronger industrial base can diversify incomes and reduce dependence on primary production.

Question 2

What factors influence the location of an industry?

Answer:

Industries consider raw materials, labour, power, capital, transport, markets, and government policy. The importance of each factor depends on the product and production process.

Question 3

How can industries reduce air and water pollution?

Answer:

They can use cleaner fuels and efficient processes, install filters and effluent-treatment plants, recycle water, and monitor emissions. Preventing pollution at the source is usually more effective than treating it later.

Question 4

What is the central idea or skill tested in Manufacturing Industries?

Answer:

The central focus is: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. This is the starting point for a strong answer from this chapter.

Question 5

Write two relevant points for a short answer based on Manufacturing Industries.

Answer:

First point: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports.
Second point: Industries consider raw materials, labour, power, capital, transport, markets, and government policy. Link the two points clearly instead of listing them without explanation.

Question 6

How does the first key idea in Manufacturing Industries lead to an important result or conclusion?

Answer:

Begin with the key idea: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. Then connect it to the result: Industries consider raw materials, labour, power, capital, transport, markets, and government policy.

Manufacturing Industries - Continued

Question 7

What evidence, calculation, incident or concept best supports the first main idea in Manufacturing Industries?

Answer:

Use this supporting detail: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. A stronger industrial base can diversify incomes and reduce dependence on primary production. The relevant detail should be stated before giving the final conclusion.

Question 8

Explain the importance of the second major idea in Manufacturing Industries.

Answer:

Industries consider raw materials, labour, power, capital, transport, markets, and government policy. The importance of each factor depends on the product and production process. Its importance lies in showing how the chapter develops the topic beyond a simple fact or definition.

Question 9

What common mistake should a student avoid while answering a question from Manufacturing Industries?

Answer:

Do not give only a conclusion. Explain the reasoning with a correct detail, such as: They can use cleaner fuels and efficient processes, install filters and effluent-treatment plants, recycle water, and monitor emissions.

Question 10

Compare the first and second important ideas in Manufacturing Industries.

Answer:

The first idea is: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. The second idea is: Industries consider raw materials, labour, power, capital, transport, markets, and government policy. A complete comparison states both the difference and the connection between them.

Question 11

Show a cause-and-effect link from Manufacturing Industries.

Answer:

Cause or starting point: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. Effect or outcome: Industries consider raw materials, labour, power, capital, transport, markets, and government policy. Use connecting words such as 'therefore', 'as a result', or 'thus'.

Question 12

What is the most useful sequence for explaining the main content of Manufacturing Industries?

Answer:

A clear sequence is: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. Next, Industries consider raw materials, labour, power, capital, transport, markets, and government policy. Finally, They can use cleaner fuels and efficient processes, install filters and effluent-treatment plants, recycle water, and monitor emissions.

Manufacturing Industries - Continued

Question 13

Give a 40-50 word answer outline for an important question from Manufacturing Industries.

Answer:

Start with the direct answer: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. Add one supporting point: Industries consider raw materials, labour, power, capital, transport, markets, and government policy. End with the outcome or message: They can use cleaner fuels and efficient processes, install filters and effluent-treatment plants, recycle water, and monitor emissions.

Question 14

How should you support an answer from Manufacturing Industries with a relevant example or fact?

Answer:

Use a precise example or explanation: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. State the fact, then explain its significance rather than leaving it as a name or date alone.

Question 15

How can an examiner see that you understand, rather than memorise, Manufacturing Industries?

Answer:

Connect the idea to its reason or result. For instance: Industries consider raw materials, labour, power, capital, transport, markets, and government policy. Then explain why this point matters in the chapter's context.

Question 16

State one inference that can be drawn from the main situation or concept in Manufacturing Industries.

Answer:

A sound inference is that they can use cleaner fuels and efficient processes, install filters and effluent-treatment plants, recycle water, and monitor emissions. This inference must be supported by a relevant point from the chapter.

Question 17

Frame a short competency-based response using the first two ideas in Manufacturing Industries.

Answer:

Apply the concept by first stating: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. Then justify the response with: Industries consider raw materials, labour, power, capital, transport, markets, and government policy.

Manufacturing Industries - Continued

Question 18

What would make an answer from Manufacturing Industries incomplete?

Answer:

An answer is incomplete if it omits the explanation or final implication. Include both: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. Also add: They can use cleaner fuels and efficient processes, install filters and effluent-treatment plants, recycle water, and monitor emissions.

Question 19

Prepare an Assertion-Reason style explanation based on Manufacturing Industries.

Answer:

Assertion: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports.

Reason: Industries consider raw materials, labour, power, capital, transport, markets, and government policy. Check whether the reason actually explains the assertion before choosing an option.

Question 20

How should you justify an answer from Manufacturing Industries in two clear steps?

Answer:

Step 1: state the concept or event - It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. Step 2: support it with the explanation or result - Industries consider raw materials, labour, power, capital, transport, markets, and government policy.

Question 21

What answer structure is suitable for a 3-mark question from Manufacturing Industries?

Answer:

Use three connected points: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. Industries consider raw materials, labour, power, capital, transport, markets, and government policy. They can use cleaner fuels and efficient processes, install filters and effluent-treatment plants, recycle water, and monitor emissions. Keep the points specific and write them in a logical order.

Question 22

What answer structure is suitable for a 5-mark question from Manufacturing Industries?

Answer:

Give an introduction, develop these key points - It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. Industries consider raw materials, labour, power, capital, transport, markets, and government policy. - and close with: They can use cleaner fuels and efficient processes, install filters and effluent-treatment plants, recycle water, and monitor emissions. Add a diagram, equation, example, or textual reference where relevant.

Question 23

How can the ideas in Manufacturing Industries be applied to a new situation or case study?

Answer:

Identify the relevant principle first: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. Then use the chapter's reasoning to explain the case: Industries consider raw materials, labour, power, capital, transport, markets, and government policy.

Manufacturing Industries - Continued

Question 24

Which detail from Manufacturing Industries is most likely to earn an extra mark when explained correctly?

Answer:

A useful detail is: They can use cleaner fuels and efficient processes, install filters and effluent-treatment plants, recycle water, and monitor emissions. Explain it in context instead of using it as an isolated statement.

Question 25

Write a brief concluding statement for an answer on Manufacturing Industries.

Answer:

A suitable conclusion is: They can use cleaner fuels and efficient processes, install filters and effluent-treatment plants, recycle water, and monitor emissions. This conclusion should follow naturally from the explanation rather than introduce a new point.

Question 26

Make a three-point revision note for Manufacturing Industries.

Answer:

1. It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. 2. Industries consider raw materials, labour, power, capital, transport, markets, and government policy. 3. They can use cleaner fuels and efficient processes, install filters and effluent-treatment plants, recycle water, and monitor emissions. Revise these points with the chapter's examples, terms, and practice questions.

Question 27

How would you self-check an answer from Manufacturing Industries before submitting it?

Answer:

Check that you have answered the exact question, used the key idea - It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. - and supported it with a reason, example, calculation, or outcome such as: Industries consider raw materials, labour, power, capital, transport, markets, and government policy.

Question 28

Why does Manufacturing Industries remain important for revision?

Answer:

It combines factual recall with explanation and application. The main takeaways are: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. Industries consider raw materials, labour, power, capital, transport, markets, and government policy. They can use cleaner fuels and efficient processes, install filters and effluent-treatment plants, recycle water, and monitor emissions.

Manufacturing Industries - Continued

Question 29

Create a final 60-80 word answer plan for a long question from Manufacturing Industries.

Answer:

Opening: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports.

Development: Industries consider raw materials, labour, power, capital, transport, markets, and

government policy. Conclusion: They can use cleaner fuels and efficient processes, install filters and

effluent-treatment plants, recycle water, and monitor emissions. Use complete sentences and include all required evidence, steps, or references.

Question 30

What is one last-minute revision question you should ask yourself about Manufacturing Industries?

Answer:

Ask: 'Can I explain why this is true or important?' A correct self-answer should include: It adds value to raw materials, creates jobs, supports other sectors, and can increase exports. and Industries consider raw materials, labour, power, capital, transport, markets, and government policy.
